

## Water Environment Forum

Water Environment Forum (WEF) is a platform for water environment professionals of Pakistan to protect water environment interests of Pakistan for the benefit of its people. Towards this, we are pleased to launch:

1. Our new **website** <http://waterenvironmentforum.pk> shall update you on our past, current and planned activities, including some key reports. But more importantly to invite you to share your views and debate on various aspects of water environment and climate change challenges at:  
<http://waterenvironmentforum.pk/blog1.html>
2. **Twitter** to keep you posted on [https://twitter.com/water\\_environ](https://twitter.com/water_environ) with current thoughts on global and Pakistan water environment and climate change challenges and activities.
3. **Facebook** at <http://web.facebook.com/waterenvironmentforum/> to provide picture of WEF and encourage participation.

As we continue our journey to create needed education and awareness of water environment and climate change challenges for the security of Pakistan, we believe your close support and participation specially through the newly created communication channels shall greatly help us to serve Pakistan effectively.
